

Developer trends survey 2023 Roman Ageev

03.06.2023

# **OUTLI NE**

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization Charts
  - Dashboard
- Discussion
  - What's next?
- Conclusion
- Appendix

# EXECUTI VE SUMMARY

Researching the data about the programming languages and databases can give a valuable business information about developer community.

Those valuable insights contain information which is useful for global IT strategy development.

### I NTRODUCTI ON

- Main goal is to identify global programming language and database trends and make valuable insights
- Research is based on data from worldwide online survey
- Analytical conclusions are made from processing vast unstructured data
- There are 3 main subparts
  - Current technology state
  - Future trends
  - Demographic statistics

### **METHODOLOGY**

- Collect and sort data from surveys and online sources
  - Web scraping
  - API
  - Datasets
- Data analysis
  - Data analyst toolkit
- Visualize findings
  - Python
  - IBM Cognos
- Create presentation and interactive dashboards
  - IBM Cognos
  - MS PowerPoint
- Make clear and reliable propositions about research topic

# RESULTS

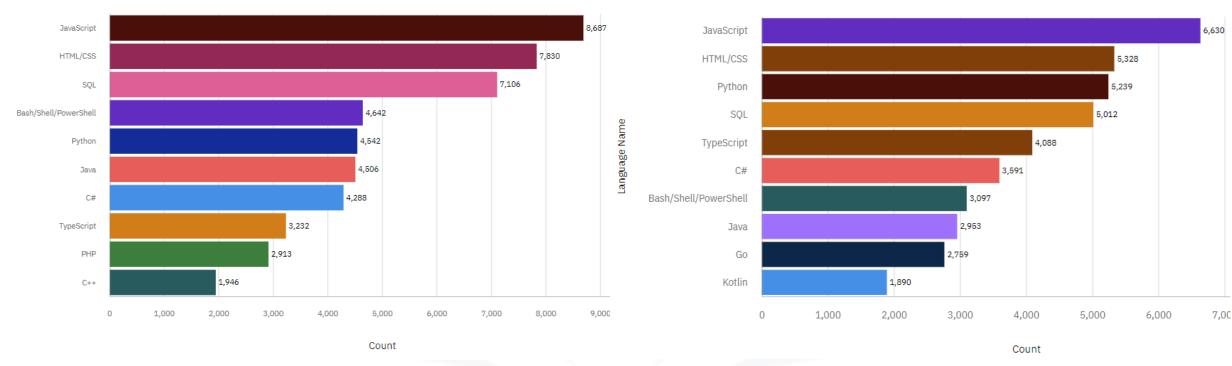

# PROGRAMM NG LANGUAGE TRENDS

#### **Current Year**

#### Top 10 Languages Worked With

Top 10 Desired Languages

# PROGRAMM NG LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

# **Findings**

- Javascript is leading the pack
- Fundamental basic languages such as SQL and HTLM/CSS are popular and still wishful to learn
- Python and Typescript have the best dynamics

# **Implications**

- Typescript is a good skill development choice for every Javascript developer
- Newcomers such as Go and Kotlin show modern trends and can lower older language popularity
- Python is still a win-win choice for everyone

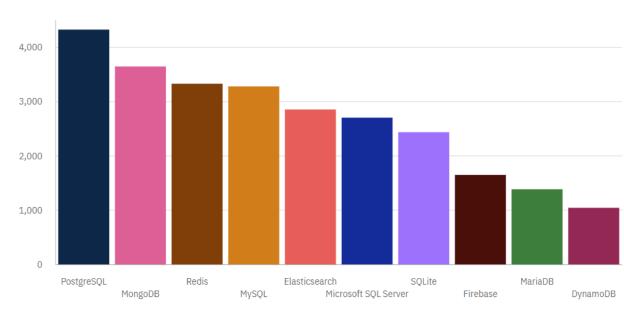

# DATABASE TRENDS

#### **Current Year**

#### **Next Year**

Database Name

IBM Devcloper

### DATABASE TRENDS - FINDINGS & IMPLICATIONS

# **Findings**

- MySQL is the most popular so far
- PostgreSQL is the most desired to use

# **Implications**

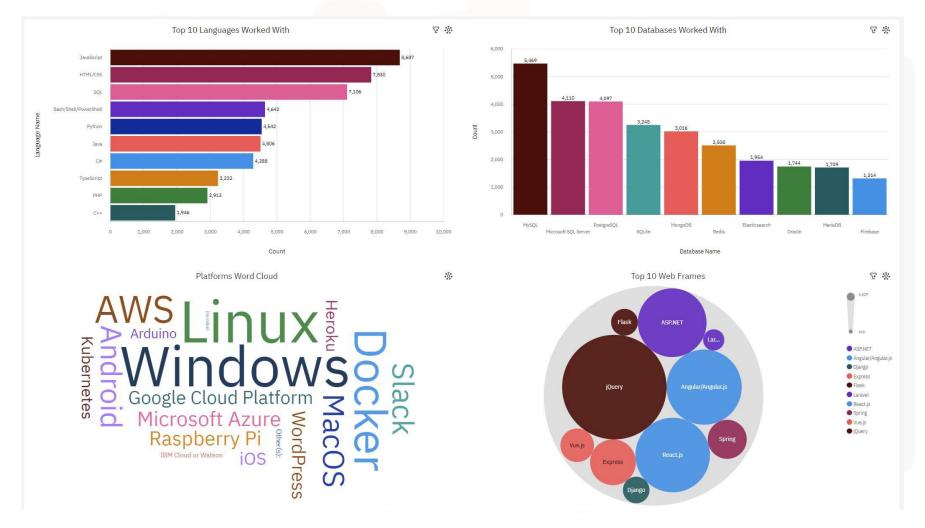

- Older products from Oracle and MS are loosing ground to new ones (Postgre, Mongo, Redis)
- PostgreSQL looks the most perpective DB at the moment

# DASHBOARD

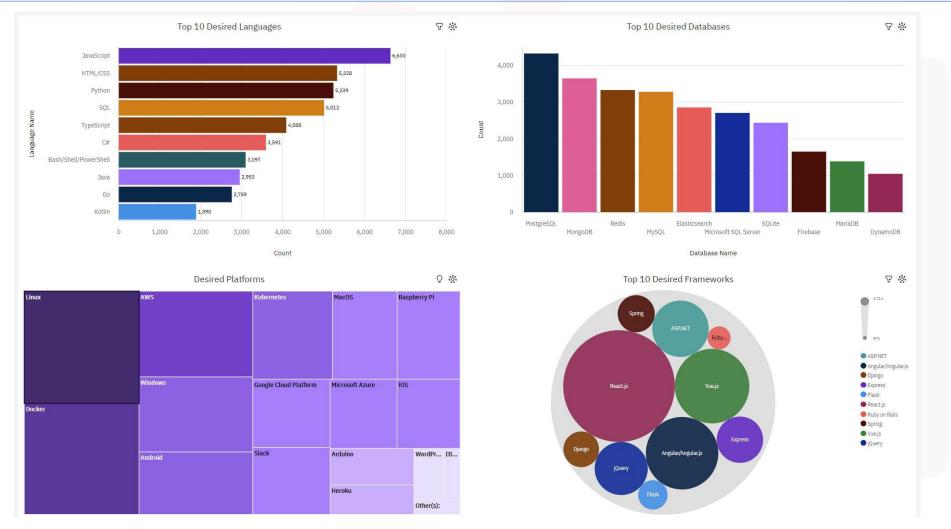

https://us1.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my\_folders%2FFuture%2BTechnology%2BTrend&action=view&mode=dashboard&subView=model000001887bdc2e35\_00000002

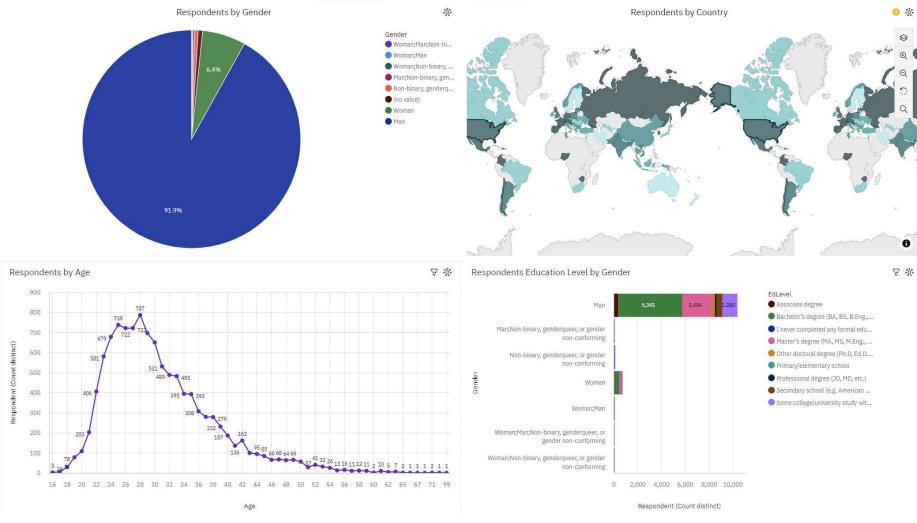

# Current Technology Usage

# Future Technology Trend

# Demographics

# DI SCUSSI ON

Some further research and discussion topics:

- Technical aspects of different languages/DBs as a factor of popularity
- Demographic variables affecting trends

# OVERALL FINDINGS & IMPLICATIONS

# **Findings**

- Web-oriented technologies are the most popular
- Newer languages and databases replace older ones
- Technologies are somewhat consistent in Y/Y change

# **Implications**

- Web applications are more perspective than classic ones
- New non-relative databases are a top-edge choice

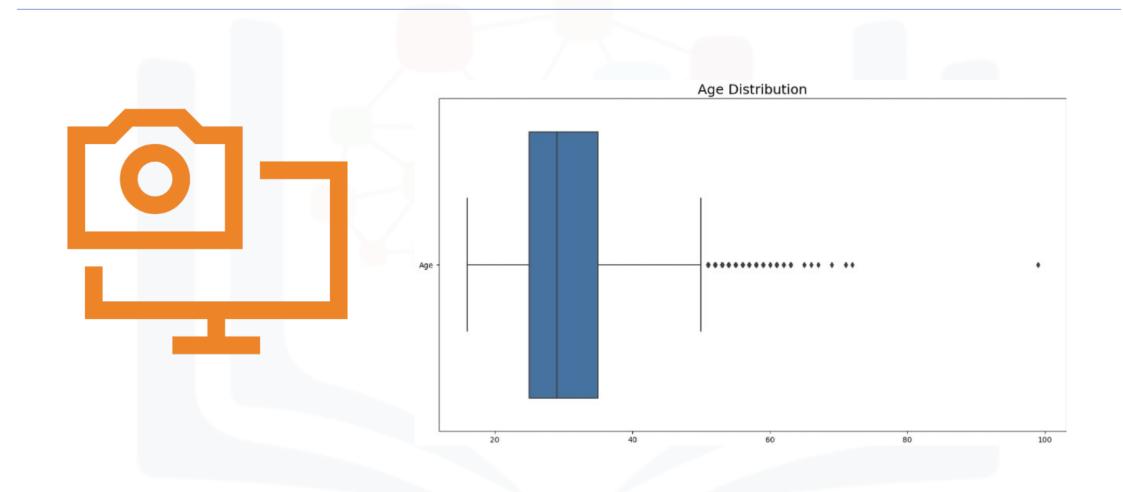

# CONCLUSI ON

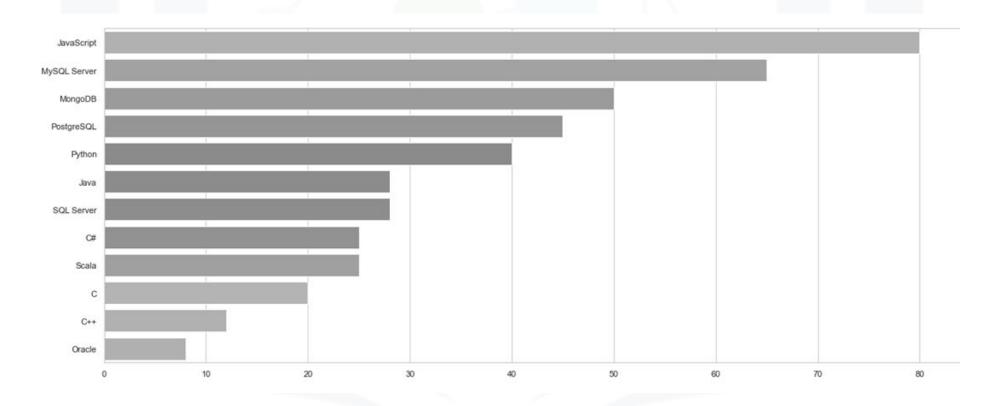

- A valuable information about popularity trends can be obtained from surveys
- Most relevant languages are web-based ones
- Most perspective databases are nonrelative ones

# APPENDI X

# JOB POSTINGS

# POPULAR LANGUAGES
